

Integrating Salivary Bioscience into Behavioral, Developmental & Health Science Research

WHERE?

Your Institution

Friday, Month 14th (8:30am–12pm)

Your Location, Room. #.

Presented By: Salimetrics Senior Applications Scientist
Hosted By: Your Name and Title and/or Institution Department

AGENDA

- **The Biology of Salivary Bioscience**
 - How biology can contribute to better data
- **Choosing The Right Biomarkers / Analytes for Your Study**
 - Stress, Sleep, Inflammation, Obesity, Fertility, and Reproductive Development
- **Common Study Sampling Designs for:**
 - Cortisol, Alpha-Amylase, Melatonin, and Other Analytes
- **Collection Techniques, Participant Compliance, and How it Affects Your Data**
 - How to achieve the best possible participant compliance
 - Maintaining sample integrity through collection, storage, and lab processing
 - Hands-on saliva collection practice
- **Q&A and One-On-One Discussions**

Individual study consultations are available
